## IN THE CLAIMS:

- 1. (Currently Amended) A composition comprising:
  - (A) a silicone oil, and
  - (B) a heat conductive filler,

with the provisos that component (A) is selected from the group consisting of silicone oils described by a general formula (A<sub>1</sub>); silicone oils described by a general formula (A<sub>2</sub>); silicone oils described by a general formula (A<sub>3</sub>); mixtures of at least two of formulae (A<sub>1</sub>);  $(A_2)$ , and (A<sub>3</sub>); and hydrosilylation reaction mixtures of formula (A<sub>1</sub>) and formula (A<sub>3</sub>), where

formula (A<sub>3</sub>) is  $[H_eR^2_{(3-e)}SiO(R^2_2SiO)_n]_eSiR^2_{[4-(c+d)]}(OR^3)_d$ , where

all instances of  $\mathbb{R}^1$  are identical or different monovalent hydrocarbon groups with aliphatically unsaturated bonds,

all instances of  $\mathbb{R}^2$  are identical or different monovalent hydrocarbon groups that do not have aliphatically unsaturated bonds,

R<sup>3</sup> stands for alkyl, alkoxyalkyl, alkenyl, or acyl,

"a" is an integer of 0 to 3,

"b" is 1 or 2,

"c" is an integer of 1 to 3,

"d" is an integer of 1 to 3,

"c+d" is an integer of 2 to 4.

```
"m" is an integer of 0 or greater,
"n" is an integer of 0 or greater,
with the proviso that "m" is 1 or greater when "a" is 0,
R4 is an oxygen atom or divalent hydrocarbon group,
"p" is an integer of 5 or greater, and
"e" is an integer of 1 to 3, and
component (B) is surface treated with component (A).
```

- 2. (Original) The composition of claim 1, where component (B) is an alumina powder.
- 3. (Original) The composition of claim 1, where component (B) is selected from component  $(B_1)$  or component  $(B_2)$ , where
- $(B_1)$  is a quasi-spherical alumina powder with an average particle size of 0.1 to 20  $\mu$ m;
  - (B2) is a mixture of (B21) and (B22), where
  - $(B_{21})$  is a quasi-spherical alumina powder with an average particle size of greater than 5 to 50  $\mu m$  , and
  - $(B_{22})$  is a quasi-spherical or irregular-shaped alumina powder with an average particle size of 0.1 to 5  $\mu$ m.
- 4. (Original) The composition of claim 3, where component  $(B_2)$  is 30 to 90 wt% of component  $(B_{21})$  and 10 to 70 wt% of component  $(B_{22})$ .
- 5. (Previously Presented) The composition of claim 1, where a content of component (B) is 500 to 3,500 parts by weight per 100, parts by weight of component (A).

6. (Original) The composition of claim 1, where component (A) is a silicone oil selected from the group consisting of formula  $(A_1)$  and formula  $(A_3)$ , and the composition further comprises (C) a component increasing the viscosity of component (A) via a hydrosilylation reaction, with the proviso that component (C) does not contain silicone oils corresponding to component (A).

7. (Cancelled).
